

Quick Start Guide (Tropical Storms)

Before you begin...

- Get ready** Before you start trading, read the “Before You Start Trading (Tropical Storms)” FAQ, and you should know where you think a named tropical storm or hurricane will make landfall.
- Open an account** If you have already opened your CX Trading Account, then skip to the next section. Otherwise you’ll have to open your account at tradewx.com/apply. Remember, Storm Contracts are regulated financial instruments in the United States and require the same information as opening a stock or futures trading account.
- Fund your account** Storm Contracts need to be purchased with funds on deposit. To deposit funds, go to tradewx.com/transfers/deposit and login. But don’t worry, we give you \$10.00 immediately just for opening the account so you can make your first purchase on us.

Ok, let’s go...

- Step 1** Go to the Tropical Storm map at tradewx.com/landfall and click on the name of the storm that you want to purchase.
- Step 2** Navigate the map to a point close to where you want to purchase a contract. Click when you think you have the right location. After you click, the map will show you the landfall points that are within 75 miles of that location and the expected payout if the tropical storm makes landfall at that location. *Note: If the point is colored red then the payout is expected to be less than the current purchase price.*
- Step 3** Use the pop-up purchase form to indicate the number of contracts that you wish to purchase. Note that fees are added to your total purchase price. When ready, click Review. Once you’ve reviewed your purchase, click Submit Order.
- Completed** Once you submit your purchase, you should see a pop-up notice confirming the details. If you missed that pop-up, you may view your purchase on the Portfolio page at tradewx.com/portfolio.
- If there’s a problem** Please contact CX directly. Our contact information is shown below.

Other useful info...

- How to monitor storms** CX updates the landfall map at least once daily. However, there are other sources of current and historical tropical storm and hurricane data that you may find useful. Please go to cxmarkets.com/resources for useful links.
- How you get paid** After each named storm makes landfall and then dissipates, each contract purchaser will receive a payout into their CX trading account. You may confirm your payout information in the History section of the Portfolio page at tradewx.com/portfolio.
- You can change locations** If you think your selected location will be more than 75 miles from the landfall location, you may switch to another location. However, this may involve a higher purchase price and there are some restrictions on switches. Please contact us for more information.
- What if there is no landfall?** If the storm does not make landfall, all positions will be rolled into the same locations for the next yet-to-be-named storm.
- You may purchase contracts any time** You can place multiple trades at any time for any active named storm and the next storm that has not been named yet. You can continue through the entire hurricane season.
- You cannot sell contracts** Once purchased, contracts will settle after each storm dissipates and either a payout is made or the purchased contract rolls to the next yet-to-be-named storm.
- What else can you buy?** Tropical storms and hurricanes bring substantial rain. CX offers a range of weather-related contracts, including rainfall. Go to tradewx.com for details on purchasing these contracts.
